System for Results & Impact (SRI)

What is the SRI?

SRI is the M&E Database/System that allow users to track the all results of program/project activities implemented to response to the logical framework results and information available for program/project progress reports.

Advantage of SRI

1. Based on activity and beneficiary setting
2. Online System (Web-based application)
3. Scaling up to Offline and Mobile devices
4. Scaling up new features for responding the needs
5. Tracking the progress results monitor on indicator and program/project activities against targets
6. Providing information for progress reports (quarterly, semi-annually, and annually basis)
7. Designing for the participatory approach
8. The real time data and monitoring system

Digital Data Collection & Reporting Tool

What is the Digital Data Collection & Reporting Tool ?

Digital Data Collection & Reporting Tool is the method of gathering any type of information using a mobile device such as a smartphone or tablet through research/survey and other evaluations.

Advantage of Digital Data Collection & Reporting Tool

- 1. Online, Offline, and Mobile devices**
- 2. Create questions with any data type**
- 3. Question library**
- 4. Khmer version available**
- 5. Quick reporting (free style and pivot reports)**

Thanks for your attention!
